

Button and tab color | Open layouts

The highlight color sets the color of the buttons on the registration page and the primary and sidebar tabs in the event window.

Note: The text color is automatically set to white or black, to contrast with the highlight color. If you select a dark color, the text is white. If you select a light color, the text is black.

To change the highlight color:

Go to the Player & Branding tab. Open **Advanced Branding** and set the Highlight Color.

This example shows green buttons on the registration page and green tabs on the event window.

The image shows two screenshots of an event interface. The top screenshot is a registration page for a 'Keynote Kickoff' event. It features a green background with a leaf pattern. The page includes a title, date, time, and an 'Add to Calendar' button. Below the title is a welcome message and two speakers: Abigail Gomez and Damien Jones. A registration form is on the right with fields for First Name, Last Name, Company, and Email, and a 'Register Now' button. The bottom screenshot shows a video player interface. The video shows a woman smiling. Below the video is an 'Ask a Question' section with a text input and a 'Send' button. At the bottom, there is an 'Event Resources' section with links to 'Keynote_Kickoff_Summary.docx' and 'Tech_detox_meditation_music.mp3'. A green sidebar tab labeled 'Slides' is visible on the right. A central box labeled 'Highlight Color' with the value '#4a9900' and a color swatch is connected to the green buttons and tabs in both screenshots by red lines.

Highlight Color #4a9900
