

Attendee Portals

- Add events to a portal
- Add breakout sessions to a portal
- Auto-fields for event details on a portal
- Have viewers register for individual events on a portal
- Sort events and breakout sessions into categories

Add events to a portal

With a portal, viewers can register one time and attend any of the events on the portal. After you select a portal layout, start adding events (segments) to your portal from the Manage Segments tab. You can include Live, Simulated Live, and On-Demand (replay) events and include a description for each event you add.

Note: An event can be linked to only one portal at a time. If you want to add an event that is used on another portal, go to that portal and remove the event first.

To add events to a portal:

1. Sign in to the Webcast Admin portal and edit the portal.
2. On the left panel, click the **Manage Segments** tab.
3. At the top right of the tab, click **Add Segments**.

The page lists events that are not linked to other portals.

4. Select the events you want to include and then click **Select Events and Folders**.

The selected events display on the Manage Segments tab under Linked Segments.

Cancel Save Changes

- Click **Save and Continue** to save the events to the portal.

Once you've added events, you can [sort them into categories](#) and hide or restrict access to them.

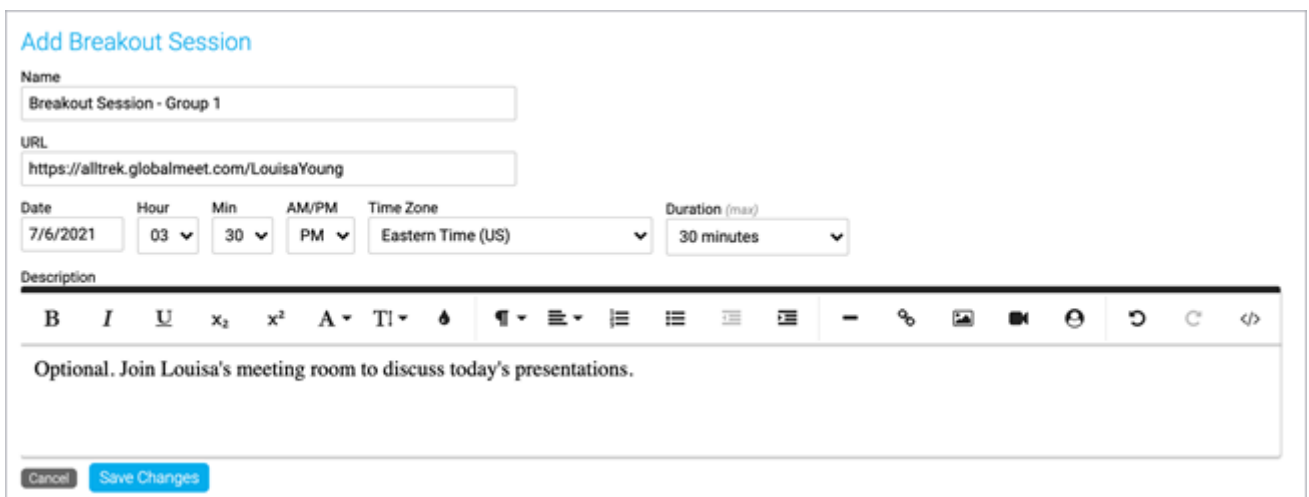

Add breakout sessions to a portal

Engage your viewers and allow viewers to attend breakout sessions from the portal agenda page. After you select a portal layout, you can start adding breakout sessions (segments) to your portal from the Manage Segments tab and link them to any meeting app you choose, including GlobalMeet Collaboration, Zoom, Microsoft Teams, and more. Breakout sessions display in the list of events on your portal.

Note: Viewers can access your meeting room link before the scheduled breakout session time. Ensure that your meeting has security features, such as a waiting room, turned on to prevent guests from joining early. Or, you can hide the View Now button after you've created the breakout session.

To add a breakout session:

1. Sign in to the Webcast Admin portal and edit the portal.
2. On the left panel, click the **Manage Segments** tab.
3. At the top right of the tab, click **Add Breakout**.
4. Enter a name for the session and your meeting link, schedule the breakout session, and optionally add a description.

The screenshot shows the 'Add Breakout Session' form. It includes fields for Name (Breakout Session - Group 1), URL (https://alltrek.globalmeet.com/LouisaYoung), Date (7/6/2021), Hour (03), Min (30), AM/PM (PM), Time Zone (Eastern Time (US)), and Duration (max) (30 minutes). There is a Description field with a rich text editor toolbar containing options for bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, insert image, video, audio, and code. The description text reads: 'Optional. Join Louisa's meeting room to discuss today's presentations.' At the bottom are 'Cancel' and 'Save Changes' buttons.

5. Click **Save Changes** to save the session. Then click **Save and Continue** to save changes to the portal.

Once you've added the sessions, you can [sort them into categories](#).

Auto-fields for event details on a portal

Jump to: [Auto-field Reference](#) | [Customization Example](#)

The portal agenda displays specific details about each event, or linked *segment*. It uses *auto-fields* - that is, placeholders or variables - to pull in specific details about each event. By default, the agenda includes the date, title, and description for the event, with View Now and Add to Calendar buttons.

To customize the details displayed, go to the Portal Layout tab and under Segment Formatting select **Custom**. This opens the Content Editor, where you can add and apply styling to auto-fields as well as include text, images, and other elements. Available auto-fields are displayed below the edit area.

Important: Segment formatting sets the content displayed for every event. Only include text or images that you would like repeated with each segment block.

Auto-field reference

The format of an auto-field is __AUTOFIELD__ (the auto-field with two underscores before and after).

The following table explains the available auto-fields and the text they display.

Auto field	Description
__SEGMENTDATE__	Scheduled day, date, and time
__SEGMENTTITLE__	Event title
__SEGMENTTIME__	Scheduled time

Auto field	Description
__SEGMENTDESCRIPTION__	The description you entered on the Manage Segments tab
__SEGMENTVIEWBUTTON__	View Now button
__SEGMENTREMINDERBUTTON__	Add to Calendar button
__SEGMENTLIVENOW__	Add a live indicator to events on the portal when their scheduled date and time arrives

Per-event registration

If you are using per-event registration, you can add event registration to the main registration page. This lets visitors register for the portal and specific events at the same time. For more information, see [Have viewers register for individual events on a portal](#).

On the Registration tab, scroll to Customize Event Landing Page and next to Landing Text, select **Custom**.

The following table explains the available auto-fields.

Auto field	Description
__ALLSEGMENTS__	All events linked on the portal
__SEGMENTBLOCK1__	The first event linked on the portal, based on the order you set on the Manage Segments tab
__SEGMENTBLOCK2__	The second event linked on the portal
__SEGMENTBLOCK3__	The third event linked on the portal
__SEGMENTBLOCK4__	The fourth event linked on the portal
__SEGMENTBLOCK#__	The <i>Nth</i> event linked on the portal

Customization example

This example adds text before the `__SEGMENTTIME__` auto-field to update the first line of each segment block. By default, text on the first line is smaller than other details. In the Content Editor, we selected the updated line and clicked the **Text Size (T)** button to increase the font size.

Segment Formatting

Modify the display of each Segment Block on your Portal pages using this template

Have viewers register for individual events on a portal

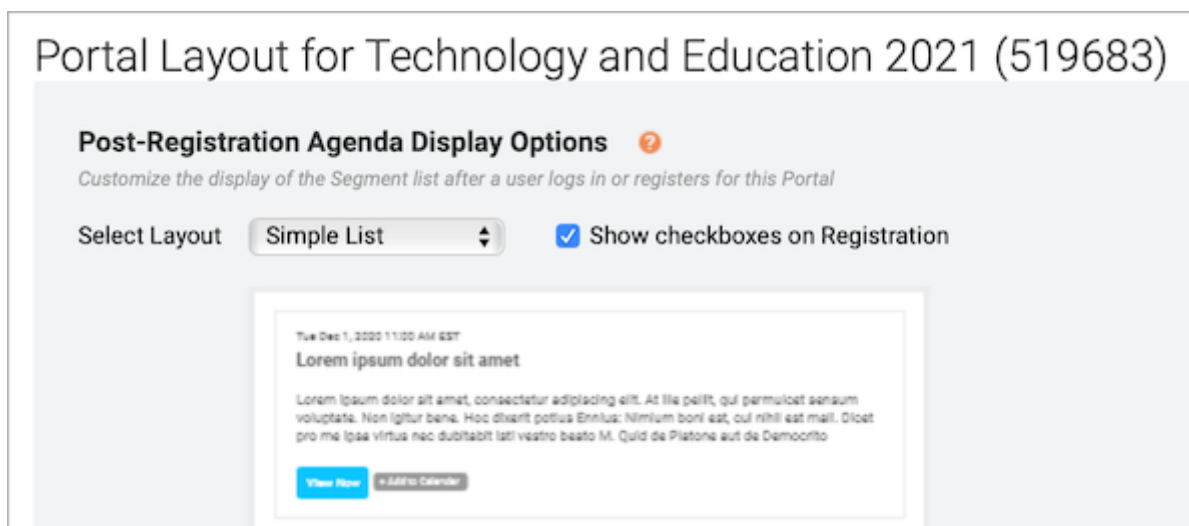

Available with Simple List and Custom portal layouts (on the Portal Layout tab).

With a portal, your viewers register one time and can attend any of the events after signing in to the portal. If you want, you can add checkboxes to the portal agenda and let viewers register for the events they plan to attend.

When a viewer enters a specific event from the portal, their registration data is included in the event's reports.

Enable registration checkboxes

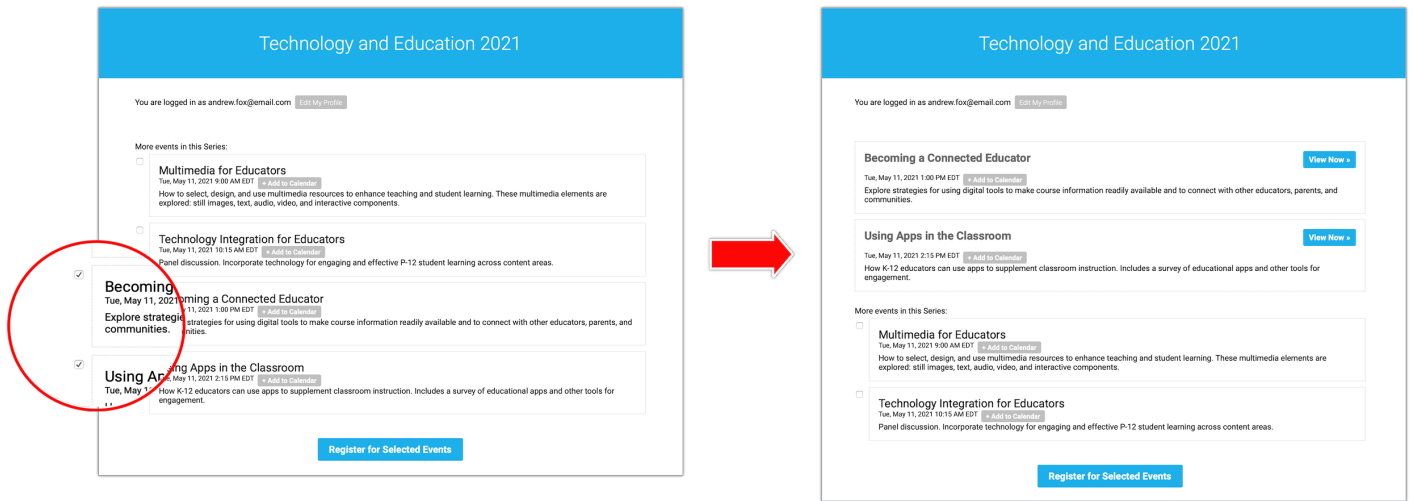

On the Portal Layout tab, select **Simple List** or **Custom** layout and select **Show Checkboxes on Registration** on **Registration**.

You can use the provided agenda format or scroll to Segment Formatting and select **Custom**.

What your viewers see

On the portal agenda, viewers initially see a list of events with check boxes. They select each event they plan to attend and then click **Register for Selected Events**. Registered events are listed events at the top, followed by additional event they could register for.

Example code

Here is the coding from the previous example.

```
<div style="border: 1px dotted #ccc; padding: 16px; margin-bottom: 10px;"> <div style="width: auto;
<div style="float: right; text-align: right;"> __SEGMENTVIEWBUTTON__ </div>
<div style="clear: both; float: left;"><span style="font-size: 12px;"> __SEGMENTDATE__ </span></div>
<div style="float: left;"><span class="reminderButton" style="margin-left: 6px;"> __SEGMENTREMINDER__
</div>
```

To use this formatting:

1. On the Portal Layout tab, scroll to Segment Formatting and select **Custom**.
2. At the right side of the editor, click **</>** to switch to code view.
3. Delete all the placeholder code.
4. Paste the example code.
5. Click **Save and Continue**.

Sort events and breakout sessions into categories

After you [add events](#) and [breakout sessions](#) to the portal, the portal automatically sorts them by their scheduled date and time. Depending on the portal layout you select, you can further group your events with automatic grouping and sort events into tabs by broadcast date or into custom *categories (or tracks)* you create.

Select a layout

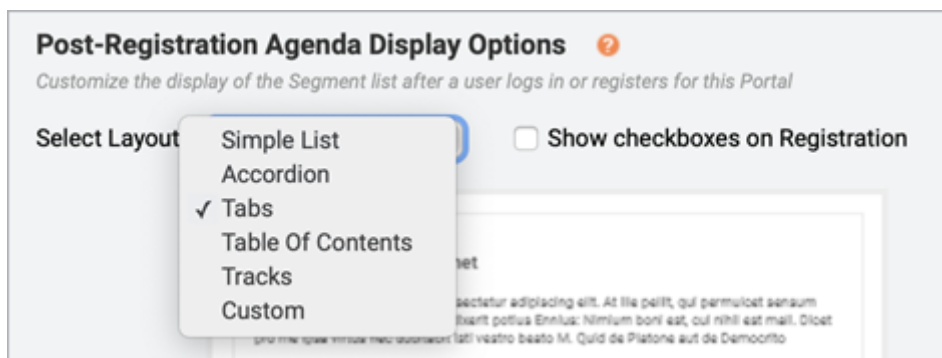

Before you categorize events and breakout sessions, you must select the correct layout.

Sign in to the Webcast Admin portal and edit the portal.

To select a layout:

1. On the left panel, click the **Portal Layout** tab.
2. Under **Post-Registration Agenda Display Options**, select the:
 - **Tabs** layout to sort events into broadcast date tabs.
 - **Accordion**, **Tabs**, **Table of Contents**, or **Tracks** layout to sort events into custom categories.

Note: Simple List and Custom layouts do not support automatic grouping.

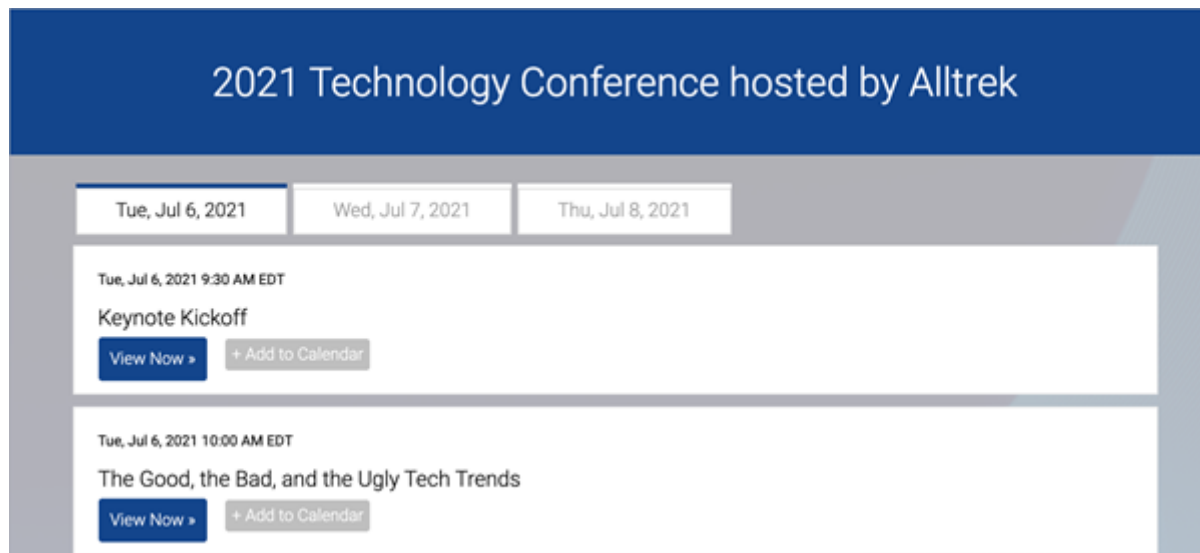

3. Click **Save and Continue**.

Sort with broadcast date tabs

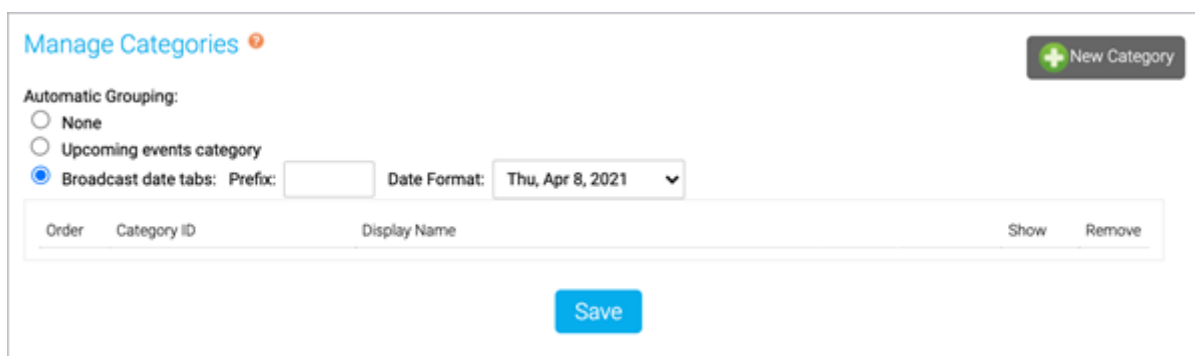

If your conference takes place over several days, you can automatically group them into tabs with their scheduled date. If the date of an event or breakout session changes, it is automatically sorted into the correct date tab on the portal.

This is an example of a portal with a Tab layout and events sorted into broadcast date tabs.

To sort events and breakout sessions into tabs by date:

1. On the left panel, click the **Manage Segments** tab.
2. On the Manage Segments tab, click **Manage Categories**.
3. On the Manage Categories window, under Automatic Grouping, select **Broadcast date tabs** and then click **Save**.

4. Then on the Manage Segments tab, click **Save and Continue**.

Sort with custom categories

Create your own custom categories to separate different conference days, topics, and more.

This is an example of a portal with a Tab layout and events sorted into custom categories.

To sort events and breakout sessions into custom categories:

1. On the left panel, click the **Manage Segments** tab.
2. On the Manage Segments tab, click **Manage Categories**.
3. On the Manage Categories window, under Automatic Grouping, select **None**.
4. Click **New Category** and enter a Category ID and a Display Name for each of your categories.

The Category ID is used to assign events and breakout sessions to the category in the Webcast Admin portal and does not display on the portal agenda page. The Display Name is the title of the category that viewers see on the portal.

Note: Category IDs can't contain any spaces or special characters.

Manage Categories

New Category

Automatic Grouping:

☒ None

☐ Upcoming events category

☐ Broadcast date tabs: Prefix: Date Format:

Thu, Apr 8, 2021

Order	Category ID	Display Name	Show	Remove
1	<input type="text" value="Day1"/>	<input type="text" value="Day 1: Trends"/>	<div>ON</div>	<div></div>
2	<input type="text" value="Day2"/>	<input type="text" value="Day 2: Cybersecurity"/>	<div>ON</div>	<div></div>
3	<input type="text" value="Day3"/>	<input type="text" value="Day 3: New Technologies"/>	<div>ON</div>	<div></div>

Save

5. Once you've created your categories, click **Save**.

On the Manage Segments tab, a new Category column displays.

6. In the Category column, select a Category ID for each event and breakout session to assign them to categories.

Note: You must assign categories to all of your events and breakout sessions for them to display on the portal.
