

Upload audio clips for use in a recorded event

For audio only broadcasts. To include pre-recorded audio in an On-Demand or Simulated Live event, upload audio files as primary event clips. Once uploaded, the clips can be added to the event in the editing studio. For more information, see [Assemble or edit an event recording](#).

You can include up to 10 primary audio clips. Each clip can be up to 10 GB and must be at least 15 seconds long. Supported file types include: M4A, MP3, WAV

For more information about primary media clip requirements, see [Primary Media Clip Specs and Requirements](#).

To upload a primary audio clip:

1. Sign in to the Webcast Admin portal and edit the event.
2. On the left panel, click the **Event Content** tab.
3. Under Media Clips, click **Upload a Clip**.

4. In the Upload a New Clip window, select Primary Event Clip as the file type, click **Choose File**, select the audio file, and then click **Submit**.

Note: The clip title is automatically generated based on the file name. You can optionally change the title before clicking **Submit**.

Upload a New Clip

Accepted file types: .3gp .asf .mov .mkv .mpeg .mpg .mp4 .f4v .webm .wmv

File Type:

☐ Primary Event Clip

☒ Overlay Video

Choose File

KeynoteAddress.mp4

Clip Title:

Keynote Address

Submit

5. After the clip has finished uploading, an Upload Successful message is displayed to let you know that the clip is being transcoded by the system. Click **Ok**.

The clip is displayed in the Primary Media Clips section with a processing status. Once the clip has finished processing, you can optionally change the title.

Primary Media Clips 		
Description	Duration	Dimensions
<div>Recording - Tech and Er</div>	00:58:55	854x480

6. Click **Save and Continue** to save changes to the event content.
