

# Video Bridge Training

- [Testing a Video Bridge Connection \(4 mins\)](#)
- [Video Bridge Training for Guest Presenters \(11 mins\)](#)
- [Video Bridge Training for Administrators/Hosts \(14 mins\)](#)

## Testing a Video Bridge Connection (4 mins)

With the Video Bridge, you can broadcast your video stream from a webcam, video conferencing system (SIP/H.323), on-site encoder (RTMP), or meeting apps such as Skype for Business.

In this video, you will learn how to test your camera and microphone connection to the Video Bridge. It's recommended to test at least 48 hours in advance using the same computer and network that you plan to use for the live event.

# Video Bridge Training for Guest Presenters (11 mins)

With the Video Bridge, you can broadcast your video stream from a webcam, video conferencing system (SIP/H.323), on-site encoder (RTMP), or meeting apps such as Skype for Business. In this video, Guest Presenters will learn how to connect and share their camera and microphone on the Video Bridge.

## Event Start Procedure

To ensure a seamless start to your event, we recommend following the steps below:

- During pre-live procedures, streams are connected and previewed well before the event is set to start.
  - Once an event is connected by the host and is in **Stand By** mode, recording will begin.
  - The yellow Stand By indicator at the top of the Live Studio says **REC** and, upon hovering, shows the following message: "The server is connected and recording but any Audio or Video captured in 'Stand By' mode will NOT be

broadcast to your audience or be made available in the automated event archive."

- The event host should instruct presenters to each silently count down from 15. At 0, the host will click **Start Webcast** (and then click **Yes, start broadcasting** in the confirmation message) to begin the presentation.

# Video Bridge Training for Administrators/Hosts (14 mins)

With the Video Bridge, you can broadcast your video stream from a webcam, video conferencing system (SIP/H.323), on-site encoder (RTMP), or meeting apps such as Skype for Business. In this video, Admins/Hosts will learn how to connect your video source, manage other presenters, and deliver a Video Bridge event to your audience.

## Event Start Procedure

To ensure a seamless start to your event, we recommend following the steps below:

- During pre-live procedures, streams are connected and previewed well before the event is set to start.
  - Once an event is connected by the host and is in **Stand By** mode, recording will begin.
  - The yellow Stand By indicator at the top of the Live Studio says **REC** and, upon hovering, shows the following message: "The server is connected and recording but any Audio or Video captured in 'Stand By' mode will NOT be

broadcast to your audience or be made available in the automated event archive."
